EXPERIENCE

Prometheus Group

Functional Implementation Consultant Lead, ePAS NA *| claude, cursor, jira, confluence, database management* *July 2026 – Present*

- Lead and mentor the functional consultant team as escalation point and internal SME for ePAS functionality, customer tendencies, and best-practice configuration guidance.
- Own the full customer implementation lifecycle as primary consultant across a portfolio of 23 enterprise accounts (~9 active concurrently), several with seven-figure annual contract value.
- Leading development of automated Prometheus configuration and product-improvement tooling using Claude and agentic coding; building internal AI knowledge systems, semantic search, and consolidated knowledge bases from meeting transcripts with leadership to scale team output.

Functional Implementation Consultant *| jira, confluence, database management* *August 2025 – July 2026*

- Solo-led customer trainings of 60+ attendees per session.
- Selected by leadership to deploy solo onsites for 17 days in February 2026 at an energy-sector client's facility in Alberta, Canada to stabilize a major escalation and rebuild customer confidence during mobile performance issues, serving as sole point of contact, triaging issues, communicating fixes to development, and applying resolutions directly.
- Reproduced a mobile-sync bug that dev and QA could not replicate by using office elevators as connectivity blockers to simulate field conditions, delivering reproduction steps that resolved the issue and informed broader mobile-sync improvements.
- Served as consultant on a major European expansion implementation and as lead consultant taking over full ownership of delivery and customer engagement on another enterprise account, including a major workflow consolidation effort.

Apex Companies

Project Engineer *| autocad, vault, smartsheet* *February 2025 – August 2025*

- Created engineering drawing sets for quotes, approvals, permits, and installations; conducted site and installation visits to ensure project advancement and completion.
- Managed project schedule and documents using Vault and Smartsheet.

Inside Project Manager *August 2024 – February 2025*

- Released purchase orders to vendors and maintained Order Write-Ups for proper project reporting; verified RFPs, COIs, and freight requests to uphold promised job completion dates.

PROJECTS

NFL Player Data Modeling – Fantasy Football *| cursor, claude, supabase, vercel, database management* *October 2024 – Present*

- Design, build, and maintain personal web applications through agentic coding tools, including a deployed public app analyzing NFL player fantasy value (by-ff.com).
- Analyzed NFL player data based on fantasy football value
- Utilized Cursor IDE to create repository and necessary edge functions and API calls

Capstone Final Design – Settlers of Catan *| solidworks* *Spring 2024*

- Headed design, prototyping, and cross-team communication independently, leading development of an electronic tabletop game from concept to a working prototype.
- Created and prototyped designs using SolidWorks, laser cutter, CNC, and other manufacturing techniques
- Used AI Coding agents and the Arduino IDE to program an electronic Settlers of Catan

SKILLS

Claude, Cursor, Lovable, Vercel, Jira, Confluence, Linear, Supabase, Database Management, AutoCAD, and SolidWorks

EDUCATION

B.S. Mechanical Engineering, Summa Cum Laude (GPA 3.92; ACT: 35) Illinois Institute of Technology

B.S. Liberal Arts Engineering, Math Minor, Summa Cum Laude (GPA 3.92) Wheaton College

ADDITIONAL HONORS

- Rensselaer Medalist
- Presidential Scholarship Recipient (Wheaton College)
- Koch Family Foundation Scholarship
- National Merit Commended Scholar
- 8x Dean's List (Wheaton College & Illinois Tech)
